

## BOURDON TUBE PRESSURE GAUGE OXYGEN DUTY

An impressive technical specification and wide range of standard features make the PREMIUM the obvious choice for a wide range of process and engineering applications.

Embodying an all 316 Stainless Steel case and bezel construction, the 950GP incorporates a solid baffle wall and blow out back for operator protection and standard features such as IP67 environmental protection, not normally available on comparative units.

The 950GP is specifically manufactured for use on OXYGEN and as such is cleaned for Oxygen service with no oil or grease contamination.

A restrictor in the inlet is a standard feature.

We can supply Needle, Ball or 2 Valve manifolds for the Model 950GP – See separate Datasheet.

The manifolds in addition to allowing the instrument to operate normally allows the following: -

- a). Checking of gauge zero at line pressure.
- b). Complete isolation of the instrument.
- c). De-pressurisation of the instrument or controlled purging.
- d). Damping of pressure pulsations and surges.
- e). Inline calibration, allows in situation calibration
